

# Appendix C - Planting List

## BMP Landscaping & Plant Lists

### General Landscaping Guidance

Vegetation is a crucial component of the Best Management Practices (BMPs) detailed in the Manual. Vegetation not only influences the beauty and aesthetic of the physical environment however it also performs a critical function in the performance of BMPs. Current research confirms the valuable role of plants, plant roots and soil in neutralizing, filtering, and taking up pollutants.

Thus it is important to select plants and plant communities which thrive and perform in various site conditions. Understanding the site's sun exposure, soil conditions, moisture conditions will inform the designer on the appropriate plant palette to use in particular BMPs. As mentioned previously, it is recommended that projects be designed by landscape architects and/or horticulturalists with knowledge of native plants, local sources of native plants, as well as experience in the design, installation and management of the BMPs.

Each site and each BMP require tailoring a planting plan to the various conditions, constraints and subtle nuances of topography, lighting, infiltration, drainage, and flood control strategies. The obvious design considerations are site context, site programming, microclimates, topography, irrigation potential, seasonal interest, and maintenance. The more delicate design considerations are extended ponding times, slight variations in planting zones, water velocity, habitat creation, and design controls which perform in extreme rain events. Yet another is the goal of achieving an aesthetic setting which may be "cultivated" versus "naturalistic."

The plants are grouped by: (1) trees, (2) shrubs, (3) perennials/annuals, (4) grasses and grass-like, and (5) ferns.

This Plant List section is a reproduction from the West Virginia Stormwater Management and Design Guidance Manual

West Virginia Department of Environmental Protection

November 2012

# Appendix C - Planting List

Stormwater BMP Plant List						
Plant	Light	Wetland Indicator <sup>1</sup>	Inundation Tolerance	Notes		
Trees						
<i>Acer negundo</i> Box Elder	Sun	FAC+	Yes	Flood tolerant; Winter food source for birds & mammals	●	
<i>Acer pennsylvanicum</i> Striped Maple	Part Shade-Full Shade	FACU	No	Attractive flowers; High wildlife value	●	
<i>Acer rubrum</i> Red Maple	Full Sun-Part Shade	FAC	Seasonal	Drought & flood tolerant; Attractive flowers (early spring) & fruit	●	
<i>Acer saccharinum</i> Silver Maple	Full Sun-Part Shade	FACW	Yes	Flood tolerant; Winter food source for birds & mammals	●	
<i>Acer saccharum</i> Sugar Maple	All Light	FACU-	Moderate	Tolerates moisture; Maple syrup; High wildlife value; Fall color	●	
<i>Aesculus flava</i> Yellow Buckeye	All Light	N	Moderate	Tolerates moisture; Attractive flowers & fruit	●	
<i>Aesculus glabra</i> Ohio Buckeye	All Light	FACU+	Moderate	Tolerates moisture; Attractive flowers & fruit	●	
<i>Alnus incana</i> spp. <i>Rugosa</i> Speckled Alder	Full Sun-Part Shade	FACW+	Yes	Flood tolerant; Attractive flowers; Winter food source for birds	●	
<i>Amelanchier arborea</i> Common Serviceberry	All Light	FAC-	Yes	Drought & flood tolerant; Attractive flowers; High wildlife value; Edible fruit (human)	●	
<i>Amelanchier canadensis</i> Shadblow, Serviceberry	All Light	FAC	Yes	Drought & flood tolerant; Winter food source for birds & mammals	●	●
<i>Amelanchier laevis</i> Allegheny Serviceberry	All Light	N	Yes	Moderate flood tolerance; Drought intolerance; Attractive fruit; Fragrant flowers; Winter food source for birds; Edible fruit	●	●

## Appendix C - Planting List

Stormwater BMP Plant List						
Plant	Light	Wetland Indicator <sup>1</sup>	Inundation Tolerance	Notes		
<i>Aralia spinosa</i> Devil's Walking Stick	Part Shade	FAC	No	Flood tolerant; Attractive flowers; Winter food source for birds	•	
<i>Asimina triloba</i> Pawpaw	Full Sun	FACU+	No	Flood tolerant; Attractive flowers; Food source for birds & mammals	•	
<i>Betula alleghaniensis</i> Yellow Birch	Part Shade Full Shade	FAC	Yes	Attractive peeling bark; Yellowfall color; High wildlife value; Prefers cool & moist environment	•	
<i>Betula lenta</i> Sweet Birch	Full Sun- Part Shade	FACU	No	Attractive scaly bark; Aromatic; Golden yellow fall color; High wildlife value; Sap used to make birch beer	•	
<i>Betula nigra</i> River Birch	Full Sun- Part Shade	FACW	Seasonal	Drought & flood tolerant; Attractive exfoliating bark; High wildlife value	•	
<i>Carpinus caroliniana</i> Ironwood, Am Hornbeam	Part Shade Full Shade	FAC	Moderate	Flood tolerant; Good fall color; Significant wildlife value	•	
<i>Carya alba</i> Mockernut Hickory	Part Shade	NI	No	Bright yellow fall color; Edible nuts; Significant wildlife value; Host for moths	•	
<i>Carya cordiformis</i> Bitternut Hickory	Full Sun- Part Shade	FACU+	Moderate	Flood tolerant; Yellow fall color; Significant wildlife value; Host for moths	•	
<i>Carya glabra</i> Pignut Hickory	Full Sun- Part Shade	FACU-	No	Flood intolerant; Golden yellow fall color; Moderate wildlife value & host for moths	•	
<i>Carya ovata</i> Shagbark Hickory	Full Sun- Part Shade	FACU-	Moderate	Moderate moisture; Attractive peeling bark; Moderate wildlife value; Edible nuts	•	
<i>Celtis laevigata</i> Sugarberry	Full Sun- Part Shade	FACW	Yes	Drought & flood tolerant; Significant food source for birds; Host for moths; Urban Tree	•	•

# Appendix C - Planting List

Stormwater BMP Plant List						
Plant	Light	Wetland Indicator <sup>1</sup>	Inundation Tolerance	Notes		
<i>Sympetrum laeve</i> <i>Smooth Blue Aster</i>	Full Sun-Part Shade	NI	No	Attractive flower	•	Stormwater Wetland*
<i>Sympetrum novaeangliae</i> <i>New England Aster</i>	Full Sun-Part Shade	FACW-	No	Attractive flower; Drought & flood tolerant	•	Conveyance
<i>Tiarella cordifolia</i> <i>Foam Flower</i>	Part Shade Shade	FAC-	No	Attractive flower; Semi-Evergreen	•	Regenerative Stormwater
<i>Tradescantia virginiana</i> <i>Spiderwort</i>	All Light	FACU	No	Attractive flower	•	Biofiltration
<i>Verbena hastata</i> <i>Blue Vervain</i>	Full Sun	FACW+	Yes	Attractive flowers	•	General BMP Landscaping
<i>Vernonia noveboracensis</i> <i>Ironweed</i>	Full Sun-Part Shade	FACW+	Yes	Attractive flower; Can be invasive	•	Conservation & Stormwater
<i>Veronicastrum virginicum</i> <i>Culver's Root</i>	Full Sun-Part Shade	FACU	No	Attractive flower; Flood tolerant	•	Wetland*
<i>Viola labradorica</i> <i>Alpine Violet</i>	Full Sun-Part Shade	FAC	No	Attractive flower	•	
<i>Walstenia fragarioides</i> <i>Barren Strawberry</i>	Full Sun-Part Shade	NI	No	Attractive flower; Groundcover	•	
<i>Zizia aurea</i> <i>Golden Zizia</i>	Full Sun-Part Shade	FAC	No	Attractive flower; Drought & flood tolerant	•	
Grasses (or Grass-Like)						
<i>Andropogon gerardii</i> <i>Big Bluestem</i>	Full Sun	FAC	Moderate	Forms clumps; Flood tolerant; Winter interest	•	•

Stormwater BMP Plant List		Wetland Indicator <sup>1</sup>	Inundation Tolerance	Notes	Stormwater BMP Landscaping Conservation & General BMP Convayance		Regenerative Stormwater Conveyance	Bioretention	Stormwater Wetland*
Plant	Light								
<i>Andropogon virginicus</i> Broom-Sedge	Full Sun	FACU	No	Attractive fall color; Drought and flood tolerant					
<i>Arundinaria gigantea</i> Giant Cane	All Light	FACW	Yes	Attractive fruit; Drought and flood tolerant					
<i>Carex crinita</i> Fringed Sedge	All Light	OBL	Yes	Flood tolerant					
<i>Carex laxiculmis</i> Spreading Sedge	All Light	NI	No	Evergreen; Spreads; Good groundcover	•				
<i>Carex liriod</i> Shallow Sedge	All Light	OBL	Yes	Flood tolerant	•				
<i>Carex stricta</i> Tussock Sedge	All Light	OBL	Yes	Flood tolerant	•				
<i>Chasmanthium latifolium</i> River Oats	All Light	FACU	No	Attractive fruit; Drought and flood tolerant	•				
<i>Dichanthelium clandestinum</i> Deer Tongue	Full Sun	FAC+	No	Flood tolerant	•				
<i>Elymus riparius</i> Riverbank Wild Rye	Part Shade Full Shade	FACW	Yes	Flood tolerant	•				
<i>Elymus virginicus</i> Virginia Wild Rye	Part Shade Full Shade	FACW-	No	Attractive fruit; Drought and flood tolerant; Adaptable	•				
<i>Juncus effusus</i> Soft Rush	Full Sun	FACW+	Yes	Flood tolerant	•				
<i>Juncus torreyi</i> Torrey's Rush	Full Sun	FACW	Yes	Flood tolerant	•				

## Appendix C - Planting List

# Appendix C - Planting List

Stormwater BMP Plant List						
Plant	Light	Wetland Indicator <sup>1</sup>	Inundation Tolerance	Notes		
<i>Leersia oryzoides</i> Rice Cutgrass	Full Sun-Part Shade	OBL	Yes	Flood tolerant; Good for stabilization & erosion control; Food source for birds	●	Stormwater Conveyance Wetland*
<i>Panicum virgatum</i> Switch Grass	Full Sun	FAC	No	Attractive fruit; Drought and flood tolerant	●	Regenerative Stormwater Conveyance
<i>Scirpus atrocivens</i> Green Bullrush	Full Sun	PBL	Yes	Food & cover for numerous bird species; High wildlife value	●	General BMP Landscaping Conservation & General BMP
<i>Scirpus cyperinus</i> Green Bullrush	Full Sun	FACW+	Yes	High wildlife value	●	Biodiversity
<i>Scirpus pungens</i> (formerly <i>S. americanus</i> ) Common Threesquare	Full Sun	FACW+	Yes	Food source for many species	●	Colonization & Habitat
<i>Scirpus tabernaemontani</i> (formerly <i>S. validus</i> ) Soft Stem Bullrush	Full Sun	FACW+	Yes	Attractive flowers; Food source for many species	●	Colonization & Habitat
<i>Schizachyrium scoparium</i> Little Bluestem	Full Sun	FACU-	No	Attractive fruit; Drought and flood tolerant; Tolerates poor soil conditions	●	Colonization & Habitat
<i>Tridens flavus</i> Purpletop Tridens	Full Sun	FACU	No	Attractive fruit; Drought tolerant	●	Colonization & Habitat
<i>Tripsacum dactyloides</i> Eastern Gammagrass	Full Sun	FACW	No	Attractive fruit; Flood tolerant; Evergreen	●	Colonization & Habitat
<b>Ferns</b>						
<i>Adiantum pedatum</i> Northern Maidenhair Fern	Full Shade-Part Sun	FAC-	Moderate	Colonizer; Herbal uses	●	

Stormwater BMP Plant List		Light	Wetland Indicator <sup>1</sup>	Inundation Tolerance	Notes	Stormwater BMP Landscaping Conservation & General BMP Convalescence		Bioretention	Regenerative Stormwater Convalescence	Wetland*
Plant										
<i>Asplenium platyneuron</i> <i>Ebony Spleenwort</i>	Part Shade Full Shade	FACU	Moderate	<i>Evergreen; Ground cover; Small fern</i>	•					
<i>Asplenium rhizophyllum</i> <i>Walking Fern</i>	Part Shade Full Shade	NI	No	<i>Ground cover; Small fern</i>	•					
<i>Athyrium filix-femina</i> <i>Southern Lady Fern</i>	Part Shade Full Shade	FAC	Moderate	<i>Flood tolerant</i>	•					
<i>Dennstaedtia punctilobula</i> <i>Hayscented Fern</i>	Part Shade Full Shade	NI	No	<i>Ground cover</i>	•					
<i>Dryopteris intermedia</i> <i>Intermediate Fern</i>	Part Shade Full Shade	FACU	No	<i>Ground cover</i>	•					
<i>Dryopteris marginalis</i> <i>Marginal Woodfern</i>	Part Shade Full Shade	FACU-	Moderate	<i>Evergreen; Ground cover</i>	•					
<i>Matteuccia struthiopteris</i> <i>Ostrich Fern</i>	Part Shade Full Shade	FACW	Yes	<i>Flood tolerant</i>	•					
<i>Onoclea sensibilis</i> <i>Sensitive Fern</i>	Full Shade	FACW	Yes	<i>Flood tolerant</i>	•					
<i>Osmunda cinnamomea</i> <i>Cinnamon Fern</i>	Part Shade Full Shade	FACW	Yes	<i>Flood tolerant</i>	•					
<i>Osmunda claytoniana</i> <i>Interrupted Fern</i>	Full Sun- Full Shade	FAC	Moderate	<i>Tolerates short term flooding; Low drought tolerance</i>	•					
<i>Osmunda regalis</i> <i>Royal Fern</i>	Full Sun- Full Shade	OBL	Saturated	<i>Tolerates short term flooding; Low drought tolerance</i>	•					
<i>Polystichum acrostichoides</i> <i>Christmas Fern</i>	Full Shade	FACU-	Moderate	<i>Flood tolerant; Evergreen; Ground cover</i>	•

Plant	Light	Wetland Indicator <sup>1</sup>	Inundation Tolerance	Notes	Bioretention	General BMP & Landscaping
<i>Thelypteris noveboracensis</i> New York Fern	Part Shade Full Shade	FAC	Saturated	Drought and flood tolerant; Spreading ground cover	•	•
<i>Thelypteris palustris</i> Marsh Fern	Full Sun-Full Shade	NI	Saturated	Flood tolerant; Spreading ground cover	•	
<i>Woodwardia areolata</i> Netted Chain Fern	Part Shade Full Shade	FACW+	Yes	Flood tolerant; Spreading ground cover	•	•
<i>Woodwardia virginica</i> Virginia Chain Fern	Full Sun-Full Shade	U	Yes	Flood tolerant	•	•

## Wetland Indicator

\* General Note: All of the plants with Wetland Indicators are found in wetland areas, however this chart marks those most suitable for high moisture conditions.

<sup>1</sup>Notes: SOURCE: <http://plants.usda.gov/wetland.html> for West Virginia (Region 1)

UPL = Occurs in wetlands in another region, but occurs almost always (estimated probability 99%) under natural conditions in non-wetlands

FAC = Facultative, equally likely to occur in wetlands or non-wetlands (estimated probability 34%-66%).

FACU = Facultative Upland, usually occurs in non-wetlands (estimated probability 67%-99%), but occasionally found on wetlands (estimated probability 1%-33%).

FACW = FACW Facultative Wetland, usually occurs in wetlands (estimated probability 67%-99%), but occasionally found in non-wetlands.

OBL = Obligate Wetland, occurs almost always (estimated probability 99%) under natural conditions in wetlands.

NI = No Indicator; Or change in plant taxonomy. Insufficient information was available to determine an indicator status.

A positive (+) or negative (-) sign is used for the facultative categories. The (+) sign indicates a frequency towards the wetter end of the category (more frequently found in wetlands) and the (-) sign indicates a frequency towards the drier end of the category (less frequently found in wetlands).

## Appendix C - Planting List

Stormwater BMP Plant List		Light	Wetland Indicator <sup>1</sup>	Inundation Tolerance	Notes	Conservation & General BMP Landscaping	Bioretention	Regenerative Stormwater Convalescence	Stormwater Wetland*
Plant									

**Inundation Tolerance** - Indicates the suitability of a plant based on the amount of moisture in the soil after a rain event:

No – Suitable in a site where water does not remain after a rain event (i.e., full sun, steep slope, sandy soil, windy area); Drought tolerant plants are suitable.

Moderate – Suitable in a site where soil remains damp or may remain saturated for a short time (i.e., full shade, bioretention areas; saturated soil for more than 24 hours);

Yes – Suitable in a site where soil remains saturated for most of the growing season (i.e., stormwater wetlands, bogs, swamps, pond edges, etc.)

Native to West Virginia

\*\* - Non-Native to West Virginia. All plants are native to West Virginia unless indicated with a double asterisk.
